# Clément Basdevant

## Python & Data Software Engineer

Grenoble, France | clement.basdevant38@orange.fr | Available from November 2026
linkedin.com/in/clement-basdevant | github.com/clement-basdevant | clement-basdevant.github.io/my-website

### SUMMARY

Python & data software engineer, SeaTech graduate (Grenoble INP): web and desktop interfaces (Vue.js, PyQt), data processing, time series forecasting and deep learning (PyTorch). Seeking a software or data role in Grenoble from November 2026.

### SKILLS

**Languages:** Python, C++, SQL, JavaScript, Matlab
**Data & AI:** pandas, SciPy, Matplotlib, PyTorch, N-BEATS, machine learning, deep learning, time series, data visualisation
**Web & UI:** Vue.js, Quasar, PyQt / Qt, HMI, UI/UX
**Data & systems:** PostgreSQL, TimescaleDB, Kafka, REST API, Docker, Linux, DDS (CycloneDDS), MPI
**Methods & tools:** Git, Agile / Scrum, property-based testing (Hypothesis), V-model, IEC 62304, Sphinx
**GenAI & agents:** Claude Code, AI agents, prompt engineering
**Spoken languages:** French (native), English B2/C1 (TOEIC 880), German B1

### PROFESSIONAL EXPERIENCE

**Research Engineer, Software & Data** – G2Elab, Grenoble, France **Jun 2025 – Sep 2026**
*xKy start-up project: a sensor that streams Linky smart-meter data in real time*

- Built, as a team, an infrastructure able to scale beyond 10,000 sensors.
- Developed a Vue.js / Quasar web application, deployed with Docker, for end users and researchers.
- Electricity consumption forecasting (N-BEATS, PyTorch) and analysis, visualisation and decision-support tools.
- Co-lead of the CaStore project (predictive analytics for energy data): data, forecasting and UX.
- Start-up creation: market research, go-to-market strategy, Pollutec 2025 trade show; Agile team of 4.

**Test Software Development Engineer (Master's internship)** – Trixell, Moirans, France **Mar 2024 – Aug 2024**
*Digital X-ray detectors for medical imaging · Test team, Software and Image group*

- Developed Python tools communicating with the detectors over the DDS protocol (CycloneDDS).
- Designed an HMI to explore DDS traffic, integrated into the team's test framework (IEC 62304, medical devices).
- Packaged the tool as an executable for the whole team; Agile workflow (sprints, backlog).

**Python Developer (international internship, in English)** – NTNU, Trondheim, Norway **May 2023 – Jul 2023**

- Built a new PyQt interface for REEF3D (hydrodynamic simulation), with guided input of the software's 586 parameters.
- Launched parallel computations (MPI) from the interface; ported it to Windows, Linux and macOS.

**Python Developer (first-year internship)** – CORYS, Grenoble, France **Jun 2022 – Jul 2022**

- Converted 5 Excel calculation spreadsheets into Python tools (pandas, Matplotlib) with graphical interfaces.
- Replaced the Excel solver with SciPy optimisation (BFGS); systematic validation of the results.

### OPEN-SOURCE PROJECT

**dsp-props, property-based testing library for Python** – author, open source (BSD-3) **Since Oct 2026**

- Checks the mathematical properties of signal-processing code (linearity, Parseval, invertibility…) with Hypothesis, error-model tolerances and minimal counterexamples; published on PyPI: github.com/clement-basdevant/dsp-props.
- **Contribution merged into SciPy 2.0.0**: fix for scipy.signal.lfilter and sosfilt on empty inputs (PR #26415), from a bug found with dsp-props.

### OTHER EXPERIENCE

**Trainee Cross-Country Ski Instructor (self-employed)** – École de Porte, Col de Porte, France **Since Dec 2025**

- Cross-country skiing and biathlon lessons, mostly for children; coach at the Ski Nordique Chartreuse club.

### EDUCATION

**Master's degree in Engineering (Diplôme d'ingénieur)** – SeaTech, Grenoble INP partner school, Toulon **2021 – 2024**

- IRIS track (data science, information, systems); deep learning project in computer vision.

**Preparatory classes for engineering schools (CPGE PTSI)** – Lycée Vaucanson, Grenoble **2019 – 2021**

### CERTIFICATIONS & AWARDS

- **Prix Lamblin 2024** (student award, SeaTech) | Amateur radio licence | State ski instructor diploma (in progress)

### INTERESTS

- Competitive running (CAPRG club): 10 km road in 33'18, 5 km road in 15'00, 1,500 m in 3'59"66.
- Paragliding (FFVL pilot licence); volunteer at the Coupe Icare festival. Secretary of the SeaTech Alumni association.
